

# Canon Peter Hall C of E Primary School

Year 6 - Summer Term 2024

## **Project Information**

In our Geography lessons, we will be finding the answer to the following question:

**How could our actions now influence our future world?**

This Geography project builds upon the learning completed by the year 6 children in the very first term where we investigated what Immingham is doing to tackle climate change.

Within this project we will look further into what causes global warming and climate change and how human activity can either help or hinder this problem. We will also find out exactly how green-house gasses are involved. A study of different areas of the world, and the effects that climate change is having upon them will be followed by an investigation into what countries around the world are doing to global warming and ensure that we are looking after our planet.

A summary of the key information we are learning in this topic can be found in the knowledge organiser. This is available on the class pages on the website. You can support your child in their learning by:

- Asking questions about their understanding of the facts on the knowledge organiser.
- Watching anything to do with the natural world and climate change on TV.

## **PE**

We have PE on Tuesday and Thursday. Most PE lessons will take place outdoors this half term so please ensure your child comes dressed appropriately for the changeable weather. Shorts should be worn under joggers please. Children should bring a hoodie or a jumper in case the weather is cold.

## **Welcome Back**

It's the summer term! Right now, our learning is more important than ever as we prepare for the SATs and our transition to secondary school. We still have some great activities to complete. We are certain that the children will continue with the super attitudes they showed last term and everyone will shine.

Mr Moss and Mrs March-Jones

## **Reading:**

All children in school are expected to read at least three times per week with their reading recorded using their online account. New books will be issued after reading responses have been completed.

Please note that if your child finds that they have chosen a book that they do not like or a finding too difficult, please send it back into school and we can happily change it for another. Likewise, if your child would rather read a book from home, this is also acceptable - just record it online as you would a school book.

## **Supporting your child with their maths learning:**

All children have access to their Times Tables Rock Stars account to help them master these facts that are essential for year 6 maths and beyond. The key to learning these multiplication facts is little and often! Any opportunity to read scales at home or convert measures and weights for example when cooking will be of benefit.
